WC5
CUTTING PATTERNS

DESIGNED BY: J. RANDLE
DESIGN DATE: 09/12/05

The cutting patterns in this package are designed to print full scale from Adobe Acrobat Reader™ on a standard laser jet or ink jet printer. Page scaling should be set to "None"; "Auto-Rotate and Center" should be turned off; and the print quality should be set to 300 dpi.

It is recommended that all pattern sheets be printed on good quality adhesive backed paper to simplify attaching the patterns to the face of the stock to be cut.

To attach the patterns: cut them apart, remove the backing, and stick them to the face of the material to be cut. The pattern should remain in place until all drilling, sawing, and edge sanding is completed.
